GENERAL NOTES:

* POWER:

<u>Inverters</u> gives limited back up power (usually for lights, not plugs).

<u>Generators</u> usually gives full electricity but can be noisy. Some hotels with a generator will use it only at certain hours (usually to cover evening load shedding/power outages.)

* HOT WATER

Solar hot water gives limited hot water but during the winter months; this is usually only for a few hours in the afternoon.

<u>Solar combined with electric</u> should give hot water in the afternoons and at night when there is no load shedding/power outages.

<u>24 hours hot water</u> should in theory give hot water all the time but be warned, even this may be unpredictable.

* RATES

<u>Prices</u>, especially in the small guest houses are subject to inflation or fluctuations (often on the whim of the particular staff member one speaks to), so the prices here cannot be guaranteed.

<u>Taxes</u>: Where the rates exclude the 13% VAT and the 10% service charge, these additions are cumulative (ie. add the VAT first and then the service charge on top.)

<u>Always ask for a discount</u>, mention if you are studying at the White Gompa (RYI), or if you are staying for an extended period of time. It doesn't hurt to ask, and many of these Hotels/Guest Houses will offer a special discount.

Tharlam Guest House

This guest house is about 5 minutes walk from RYI. It is set in a quiet area, with the Tharlam Monastery backing the guest house, and a rooftop terrace with views of the Stupa. For longer stays, apartments are available which have kitchenettes and a sitting area.
